RE: Vallen Safety Supply Company

Dear Joe:

I am writing to express my complete satisfaction with the concrete work at the Vallen project. As you know, I needed a contractor for the job who was knowledgeable about the new ACI and Face specifications and who could demonstrate past performance. The fact that you had received a Golden Trowel Award proved to me that you could. The end result was a floor that exceeded the Ff/FI of 25/20 by 124%.

I was equally impressed with your willingness to work with us on the schedule. When we ran into a scheduling conflict with the parking lot paving and your floor pours, you started your crews at 2:00 AM at no extra cost to me! That was a first for me in 15 years as a general contractor.

Congratulations on a job well done!

Yours truly,

Edward M. Dahl
Project Manager
